How I Design Clarity in Complex Environments

telehealth — erp system — public transportation

CASE STUDY

TELEHEALTH PLATFORM. CONTEXT

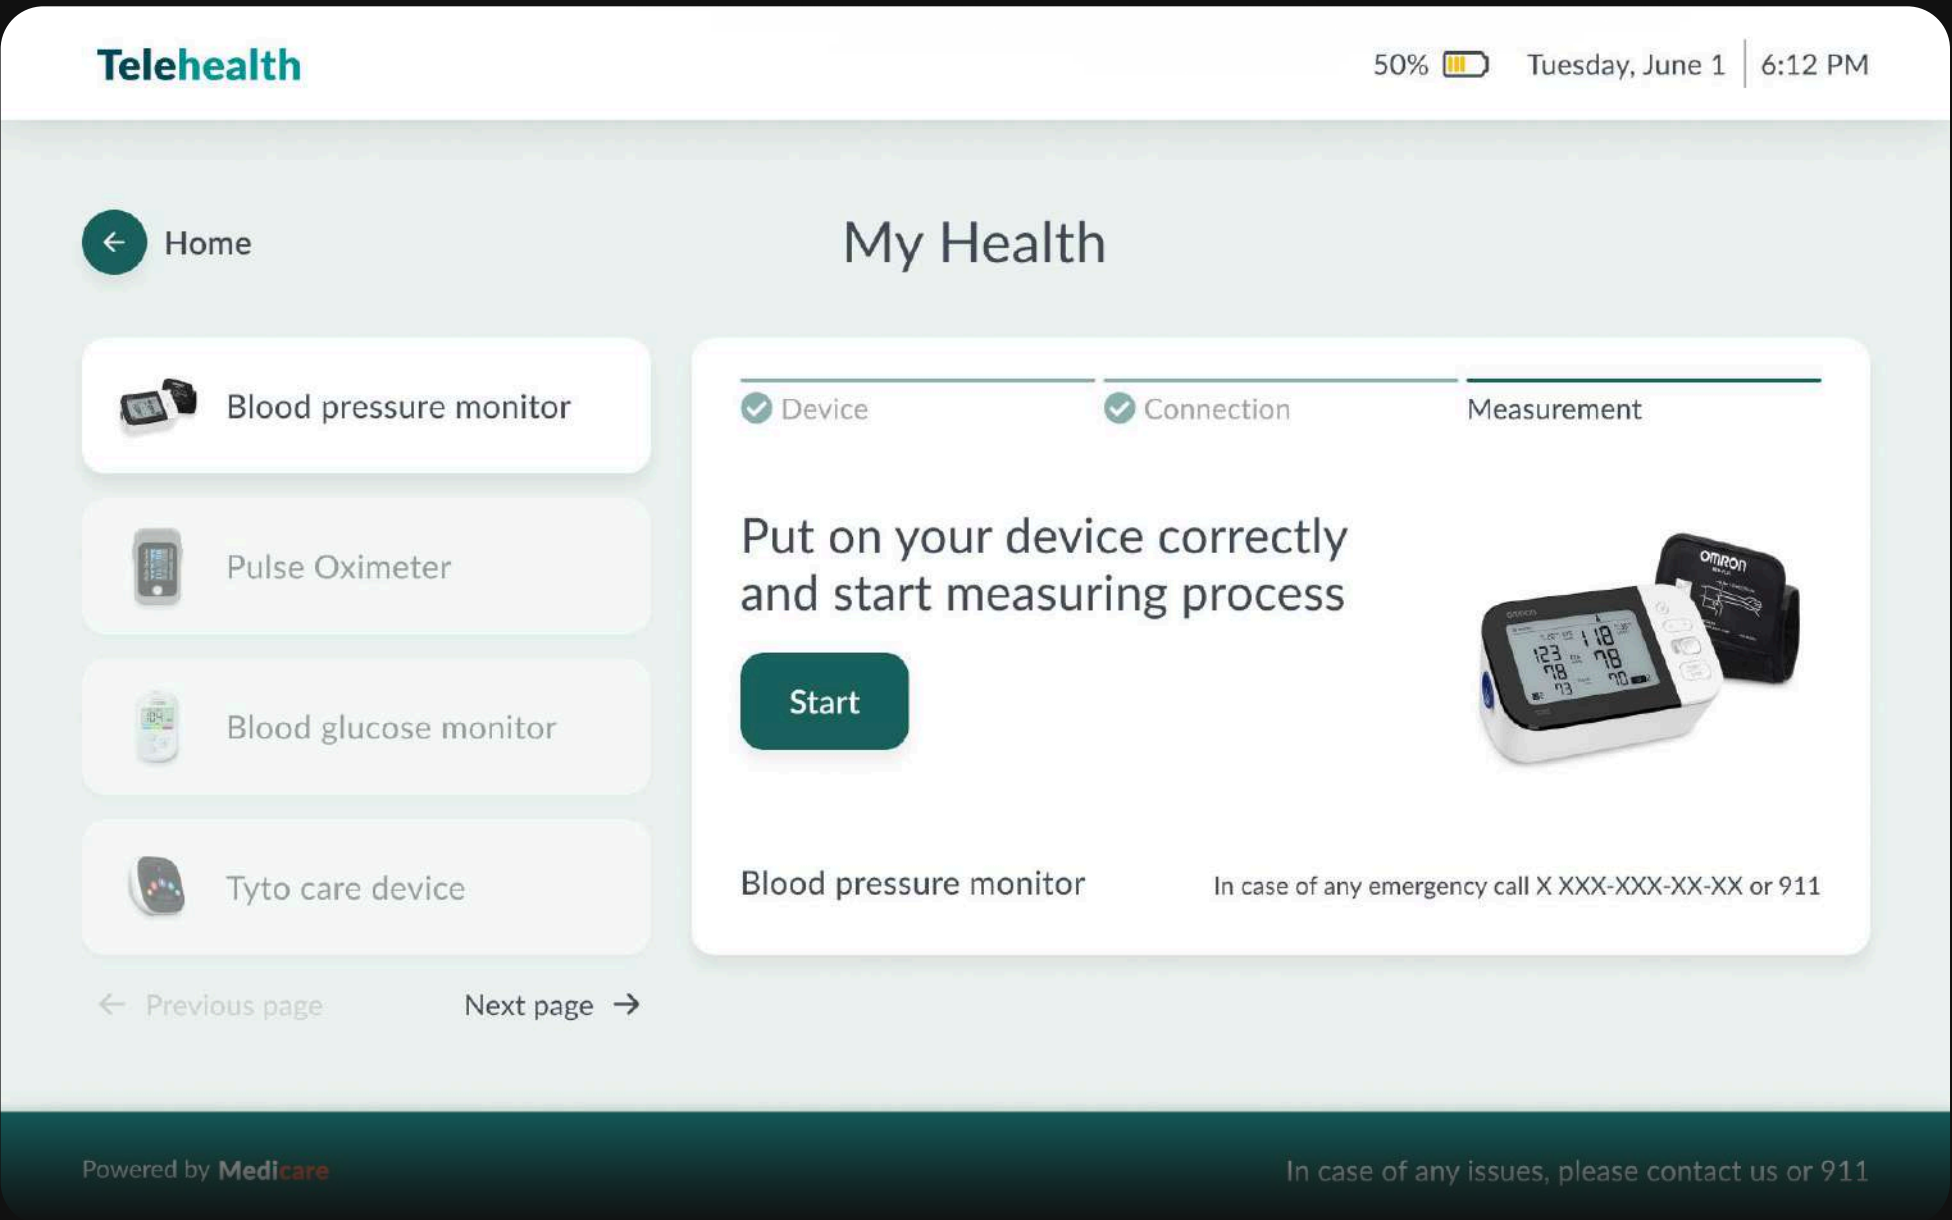

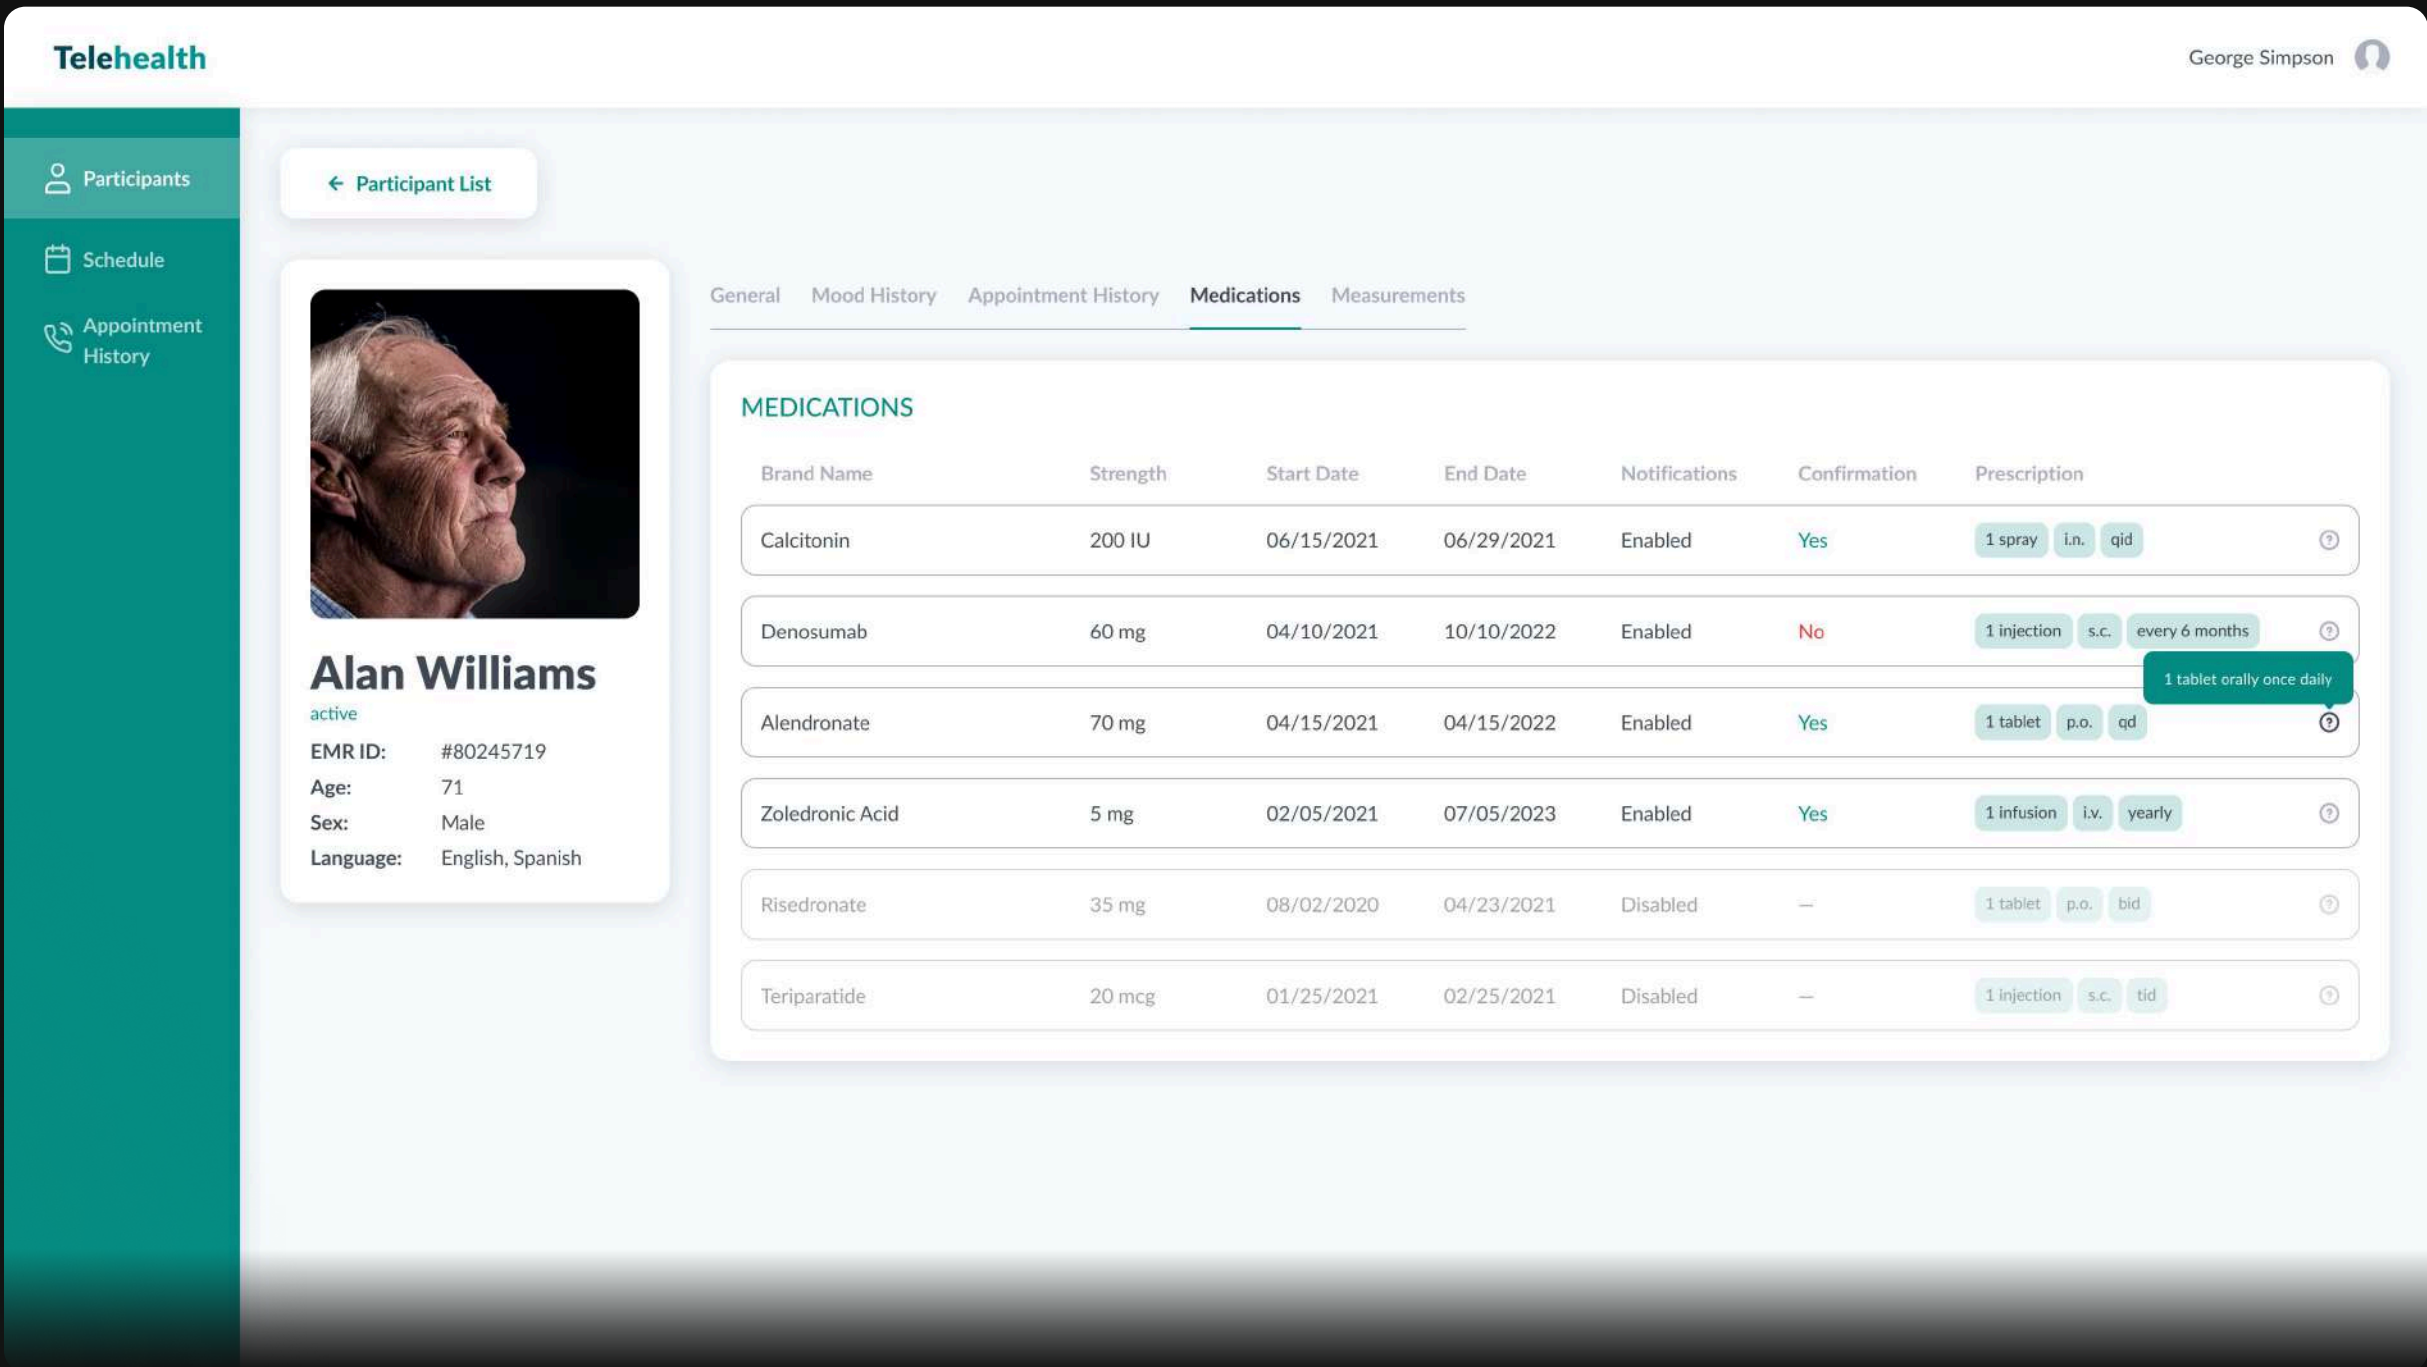

Task: Create an MVP of an accessible telehealth platform connecting doctors and patients.

Team	• Project Manager • Scrum Master • 2 Designers • 5 Developers & 2 QAs	Project stack	• Taiga UI for Web • Material Design for Tablet • WCAG 2.1 AA compliance • Figma components and styles	Stakeholders	• Medical directors of investor company • Client's company management
-------------	---	----------------------	--	---------------------	---

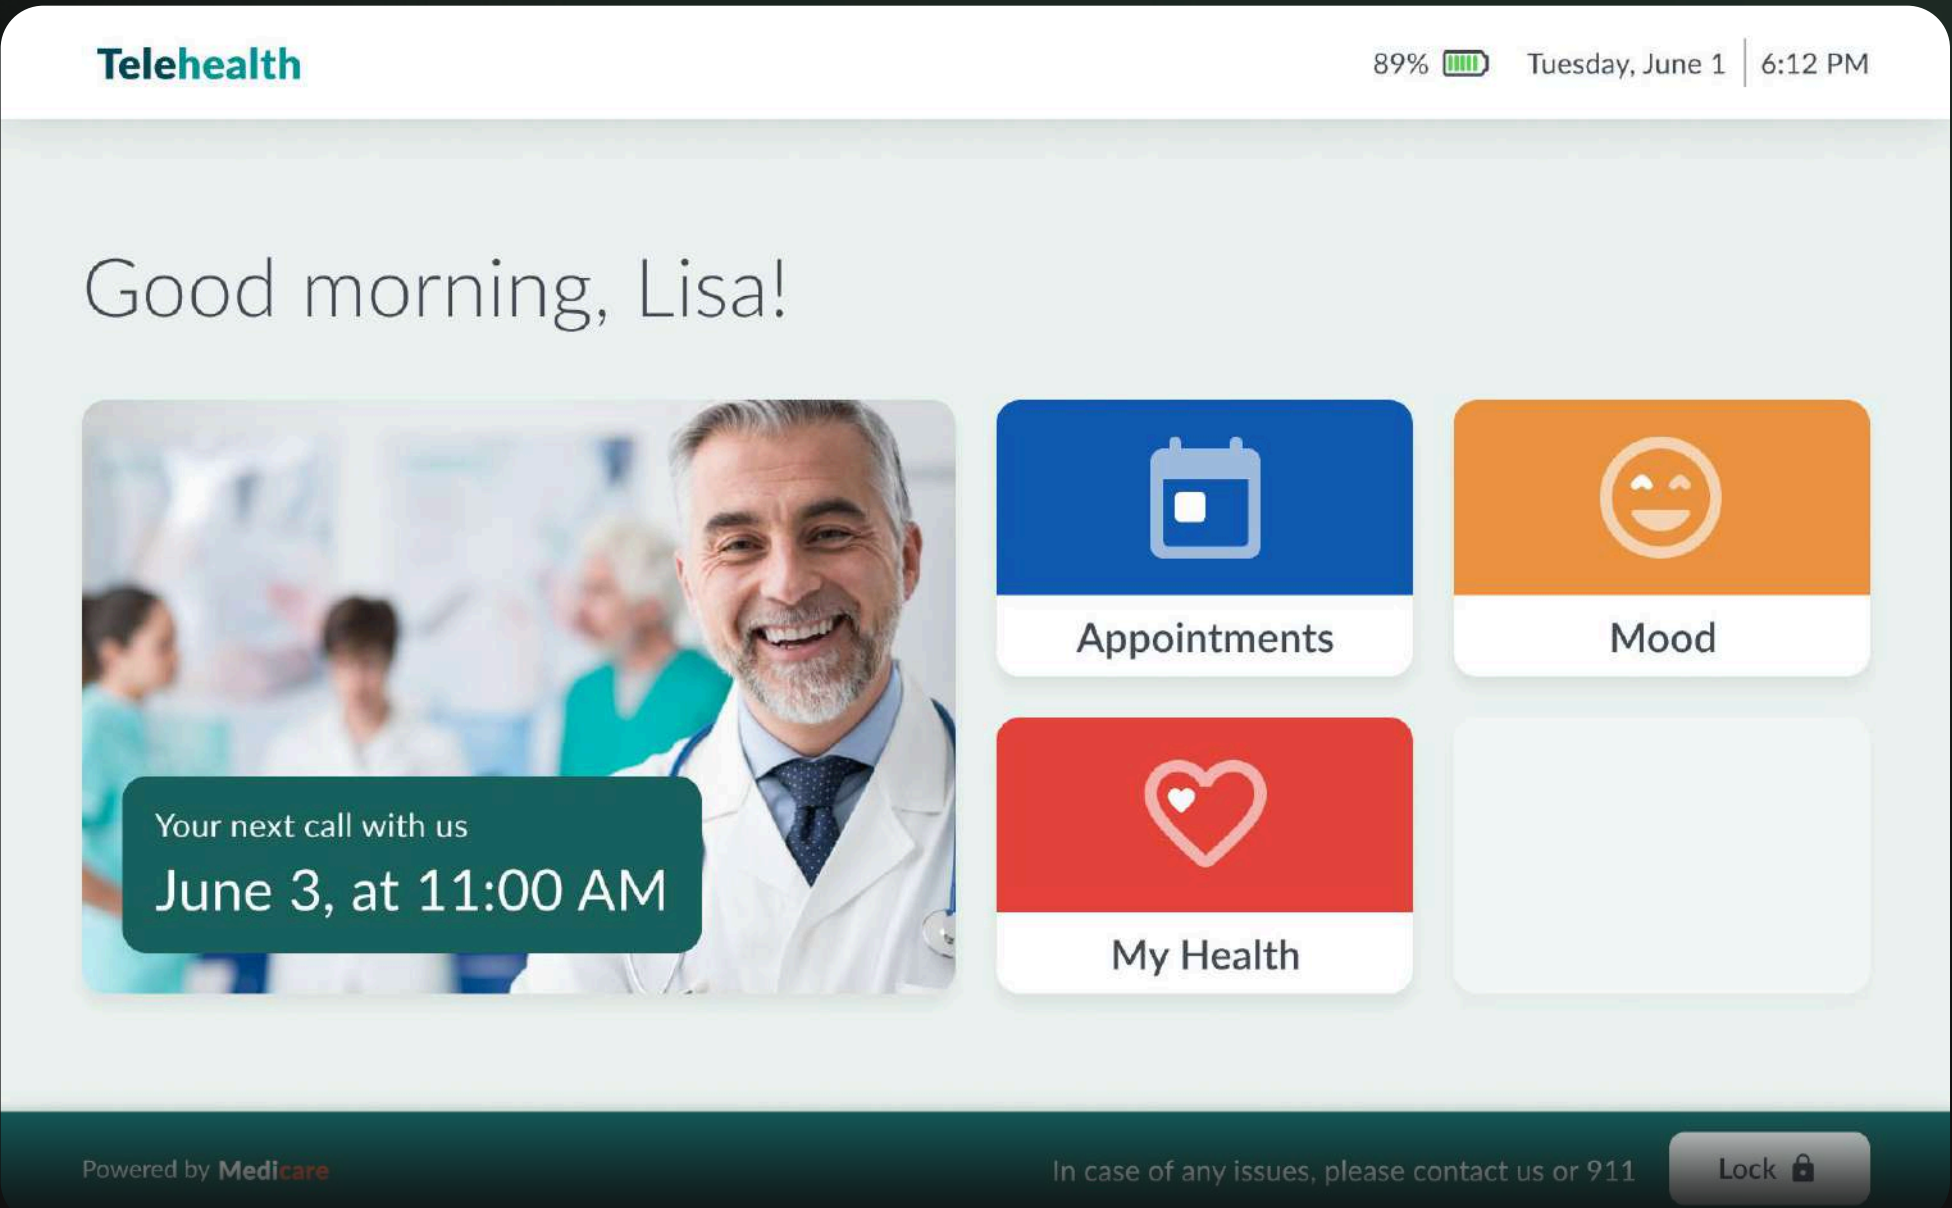

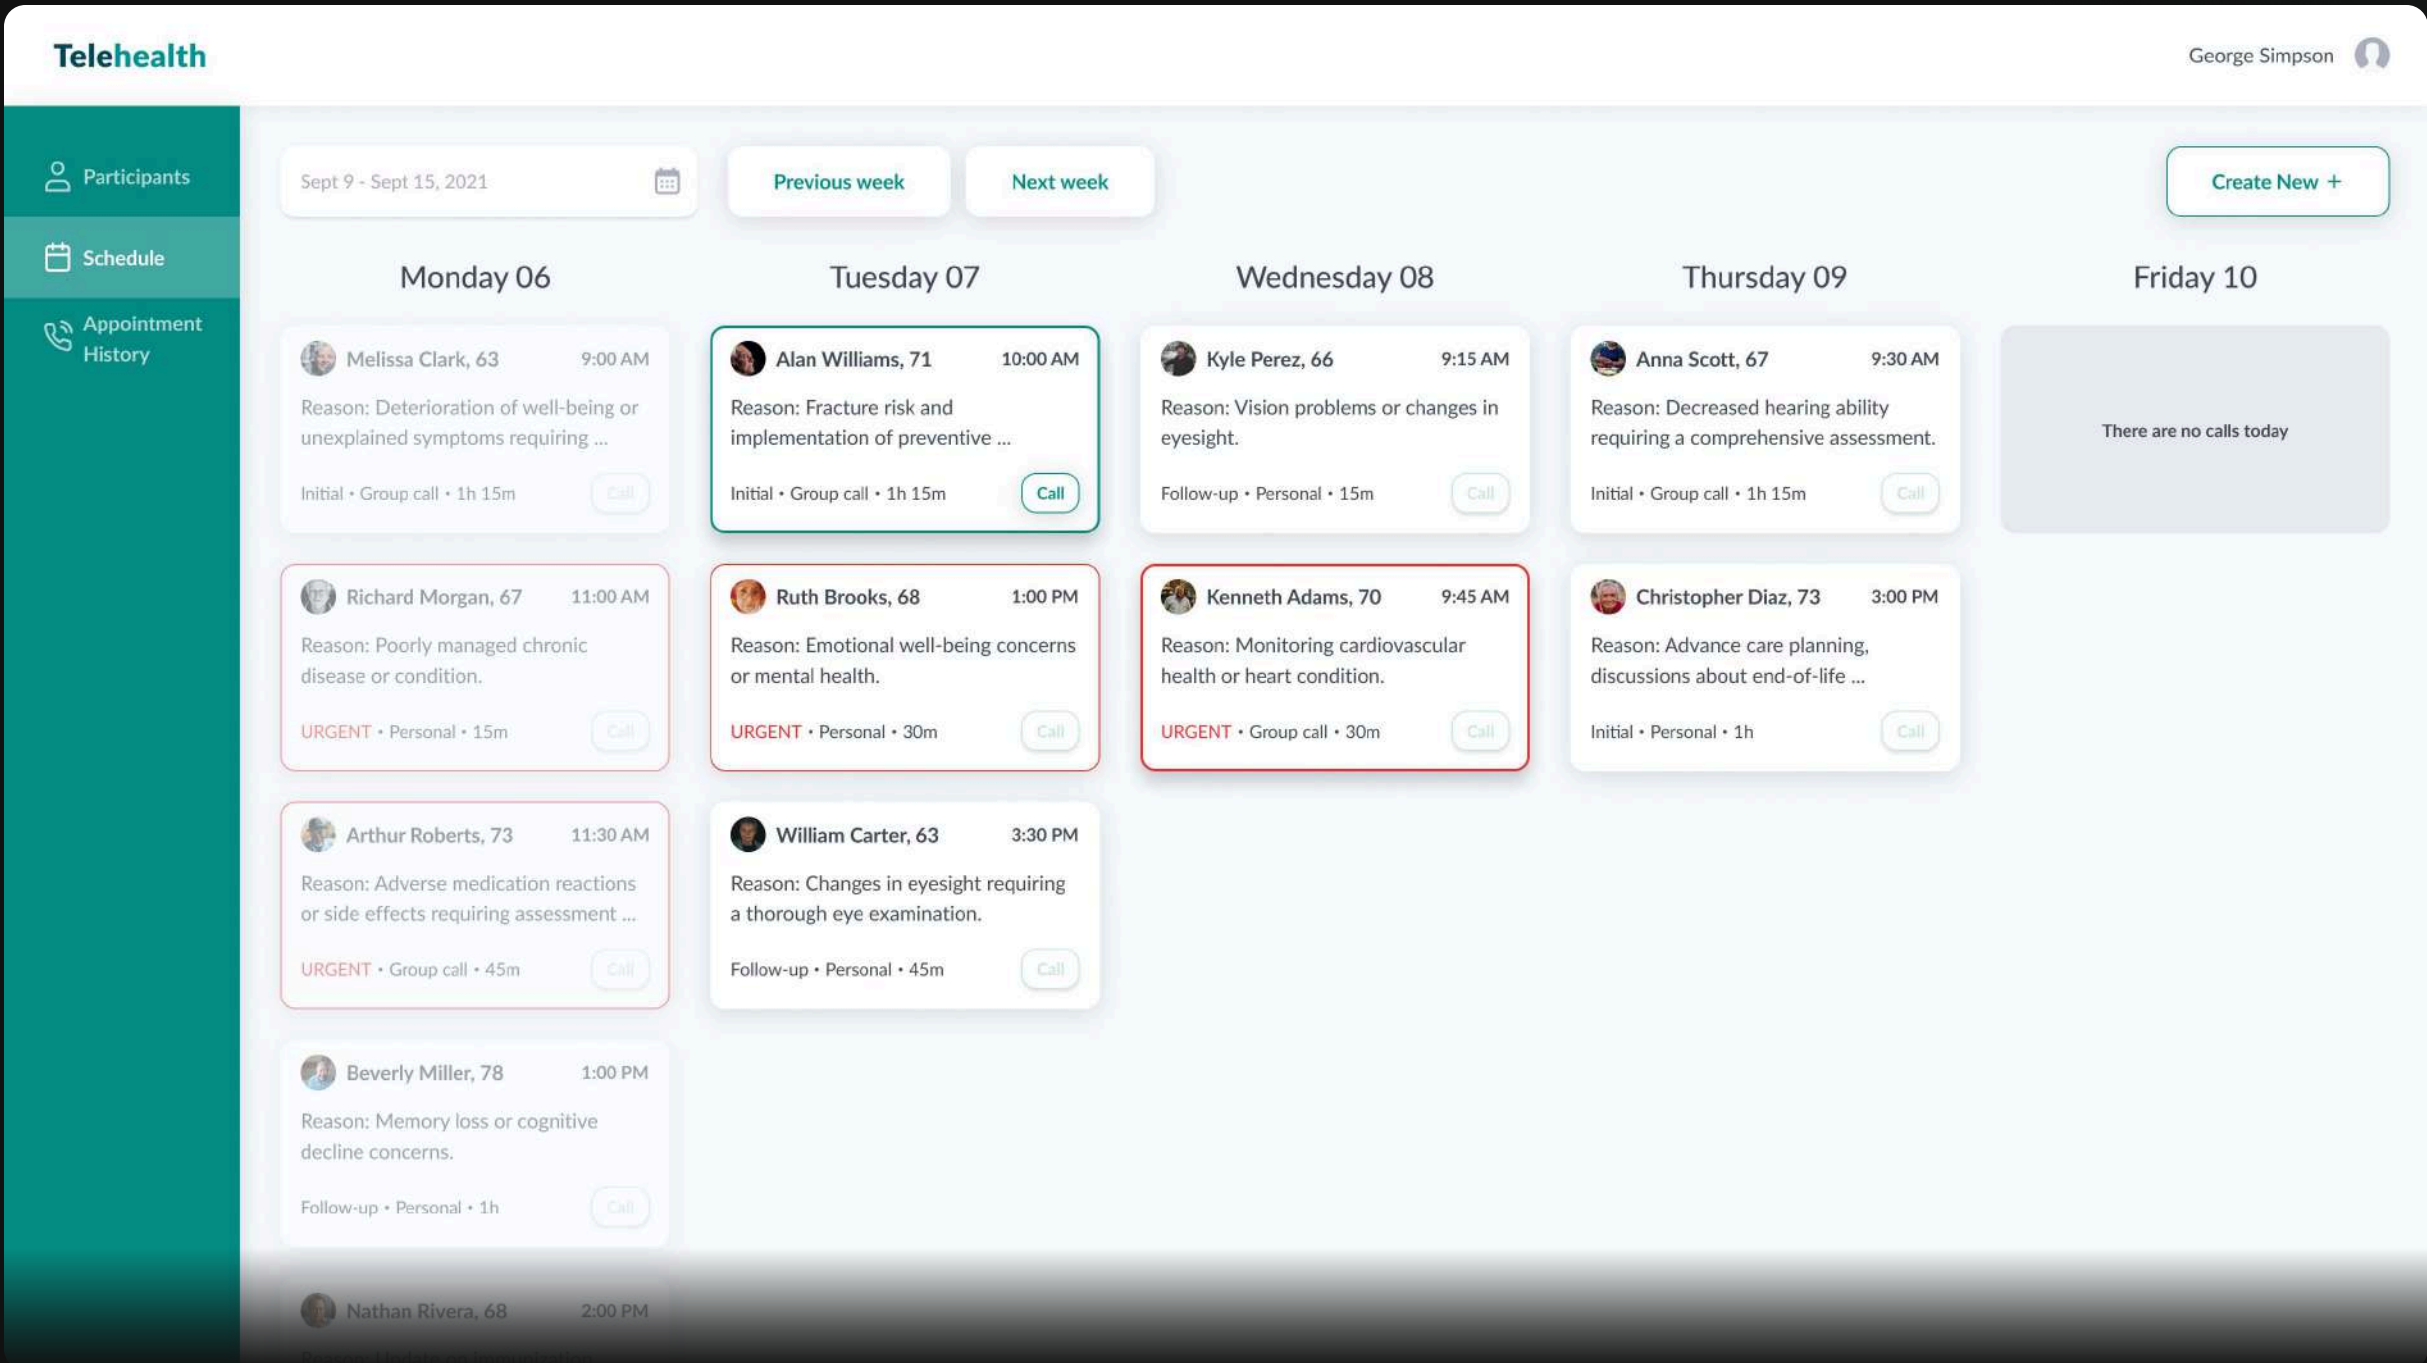

* Lead designer responsible for the patient-facing experience — from interviews and flows to final UI and design handover.

TELEHEALTH PLATFORM. CHALLENGES

- Highly regulated healthcare environment (HIPAA, WCAG)
- White-label requirement (balancing aesthetics and accessibility)
- Digitalisation of complex medical workflows for patients aged 60+

TELEHEALTH PLATFORM

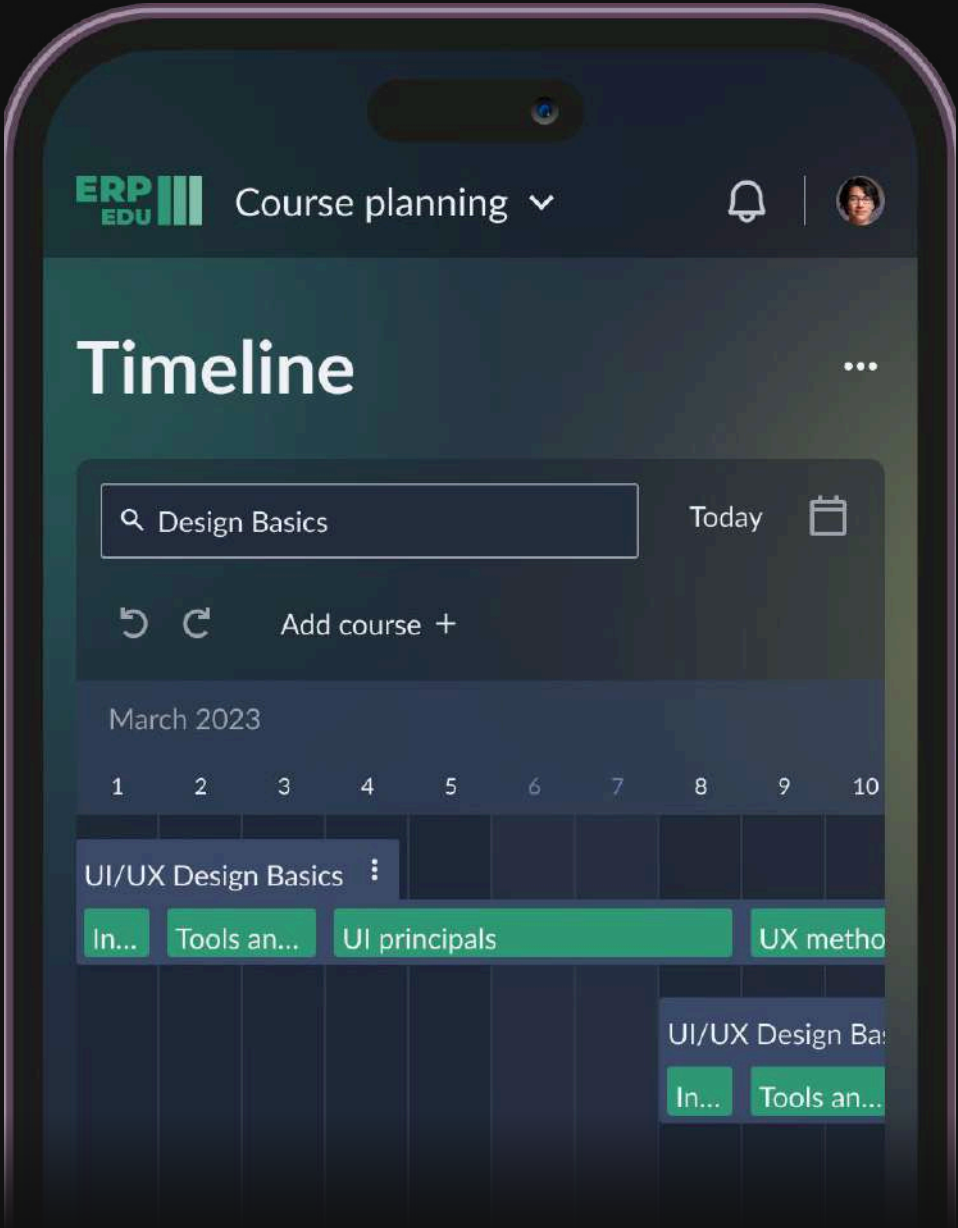

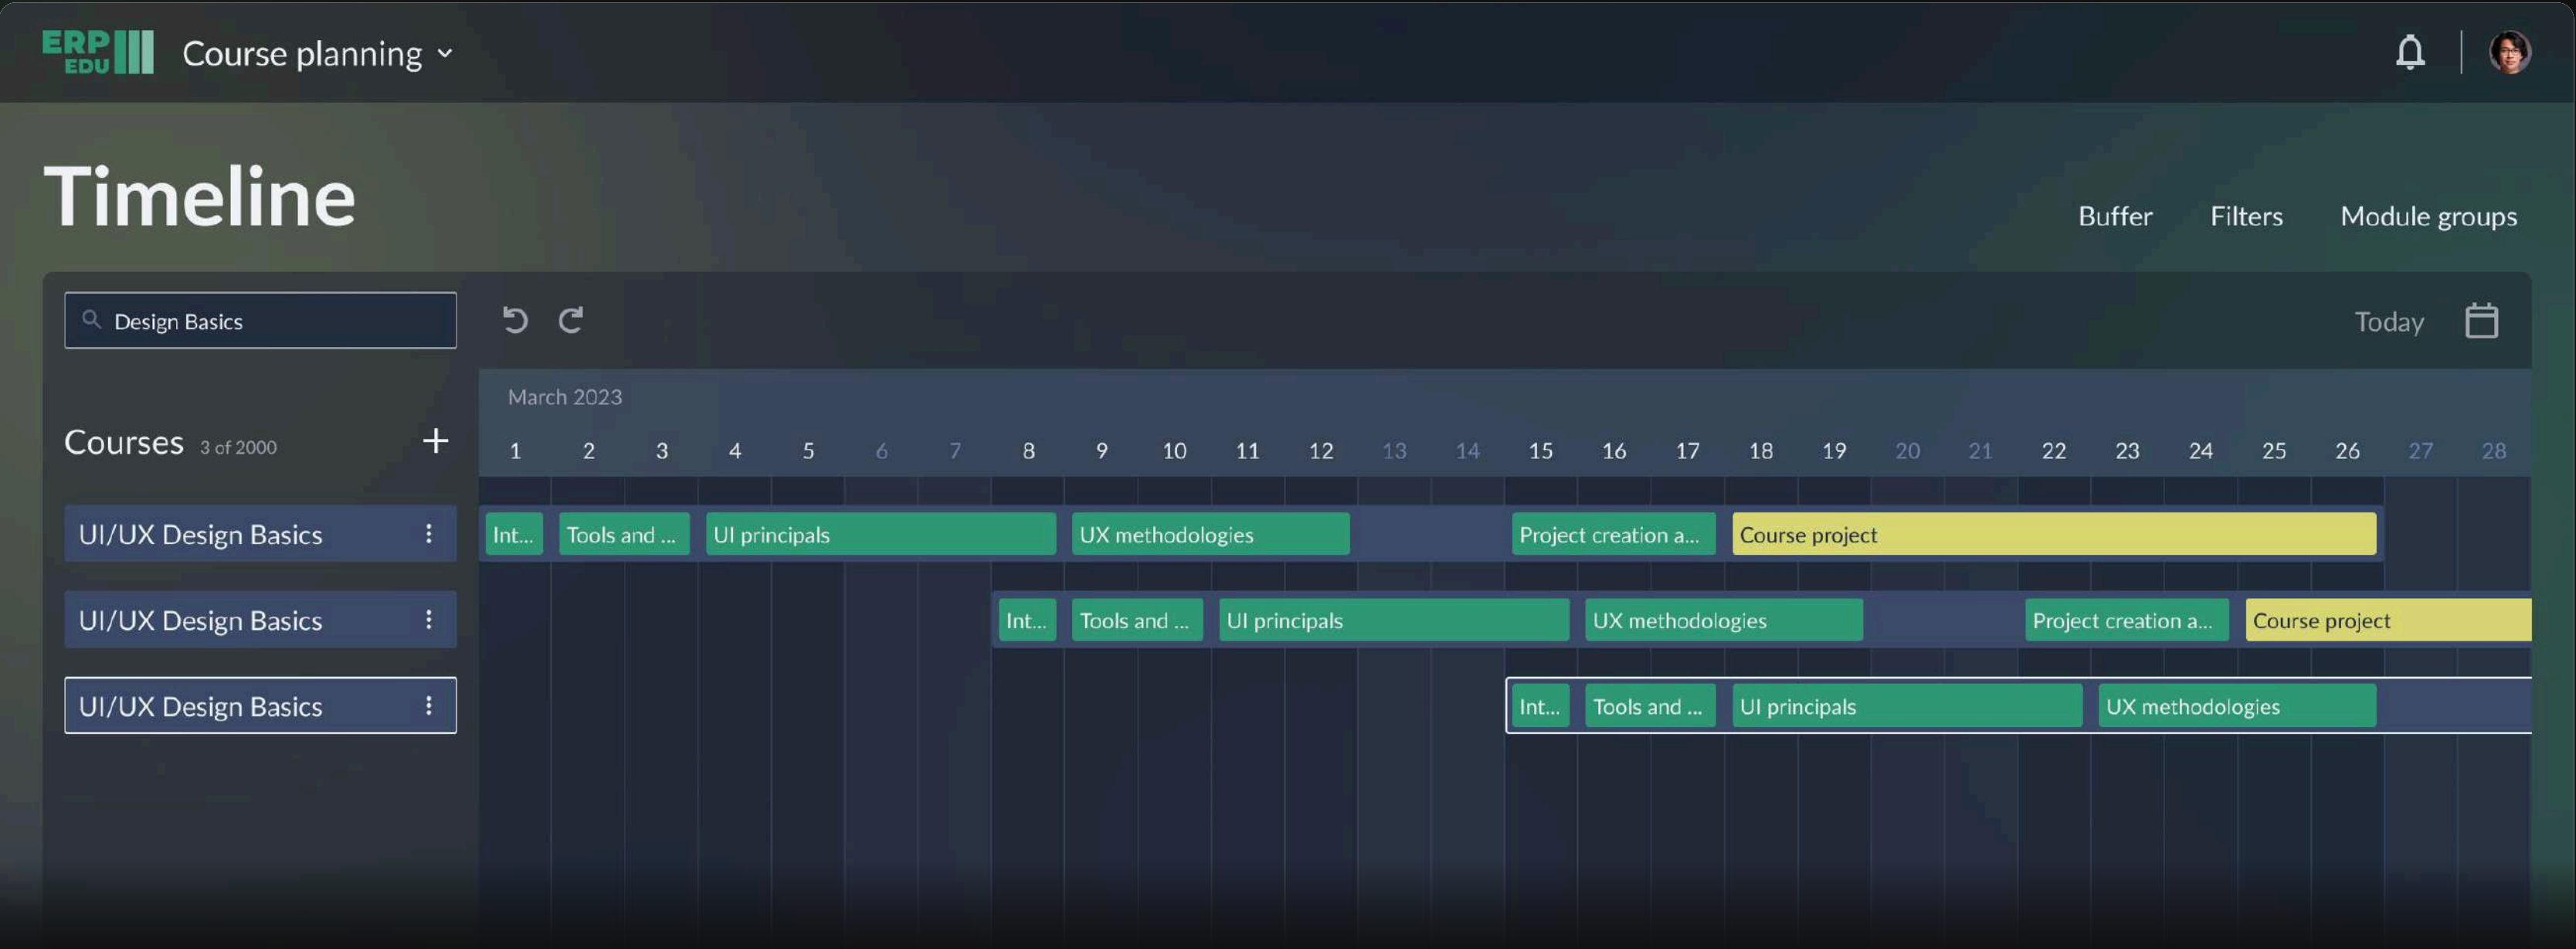

APPROACH

Conducted 40+ interviews with doctors and patients. Defined an accessibility framework and design principles. Built interactive prototypes and tested them remotely across 3 iterative refine cycles before dev handoff.

RESULTS

- Delivered **dual-surface MVP in 12 weeks** with 0 critical UX issues at launch
- Achieved **SUS score of 81** through 3 test-refine cycles before dev handoff
- Reduced **user errors per task by 54%** by redesigning guidance and tap targets
- Cut **health measurement time by 32%** by restructuring information hierarchy
- Delivered **WCAG 2.1 AA compliance** on Android

ERP SYSTEM. CONTEXT

Task: Design a tool to digitalise processes for managing educational resources.

Team	• Product Owner • Scrum Master • Designer • 4 Developers & 2 QAs	Project stack	• Material UI • WCAG 2.1 AA • Figma components, styles and variables • Storybook + Confluence for documentation	Stakeholders	• Chief Operations Officer • Head of Sales Department • Planning Managers • BAMF Officials
-------------	--	----------------------	---	---------------------	--

Co-led product discovery and UX decisions with the Product Owner, while owning all design execution (research, flows, UI).

ERP SYSTEM. CHALLENGES

- Bureaucratic decision-making chain
- Massive datasets managed across Excel and 5 separate tools
- Need to unify fragmented multi-tool workflow into one modular interface

ERP SYSTEM FOR WBS TRAINING AG

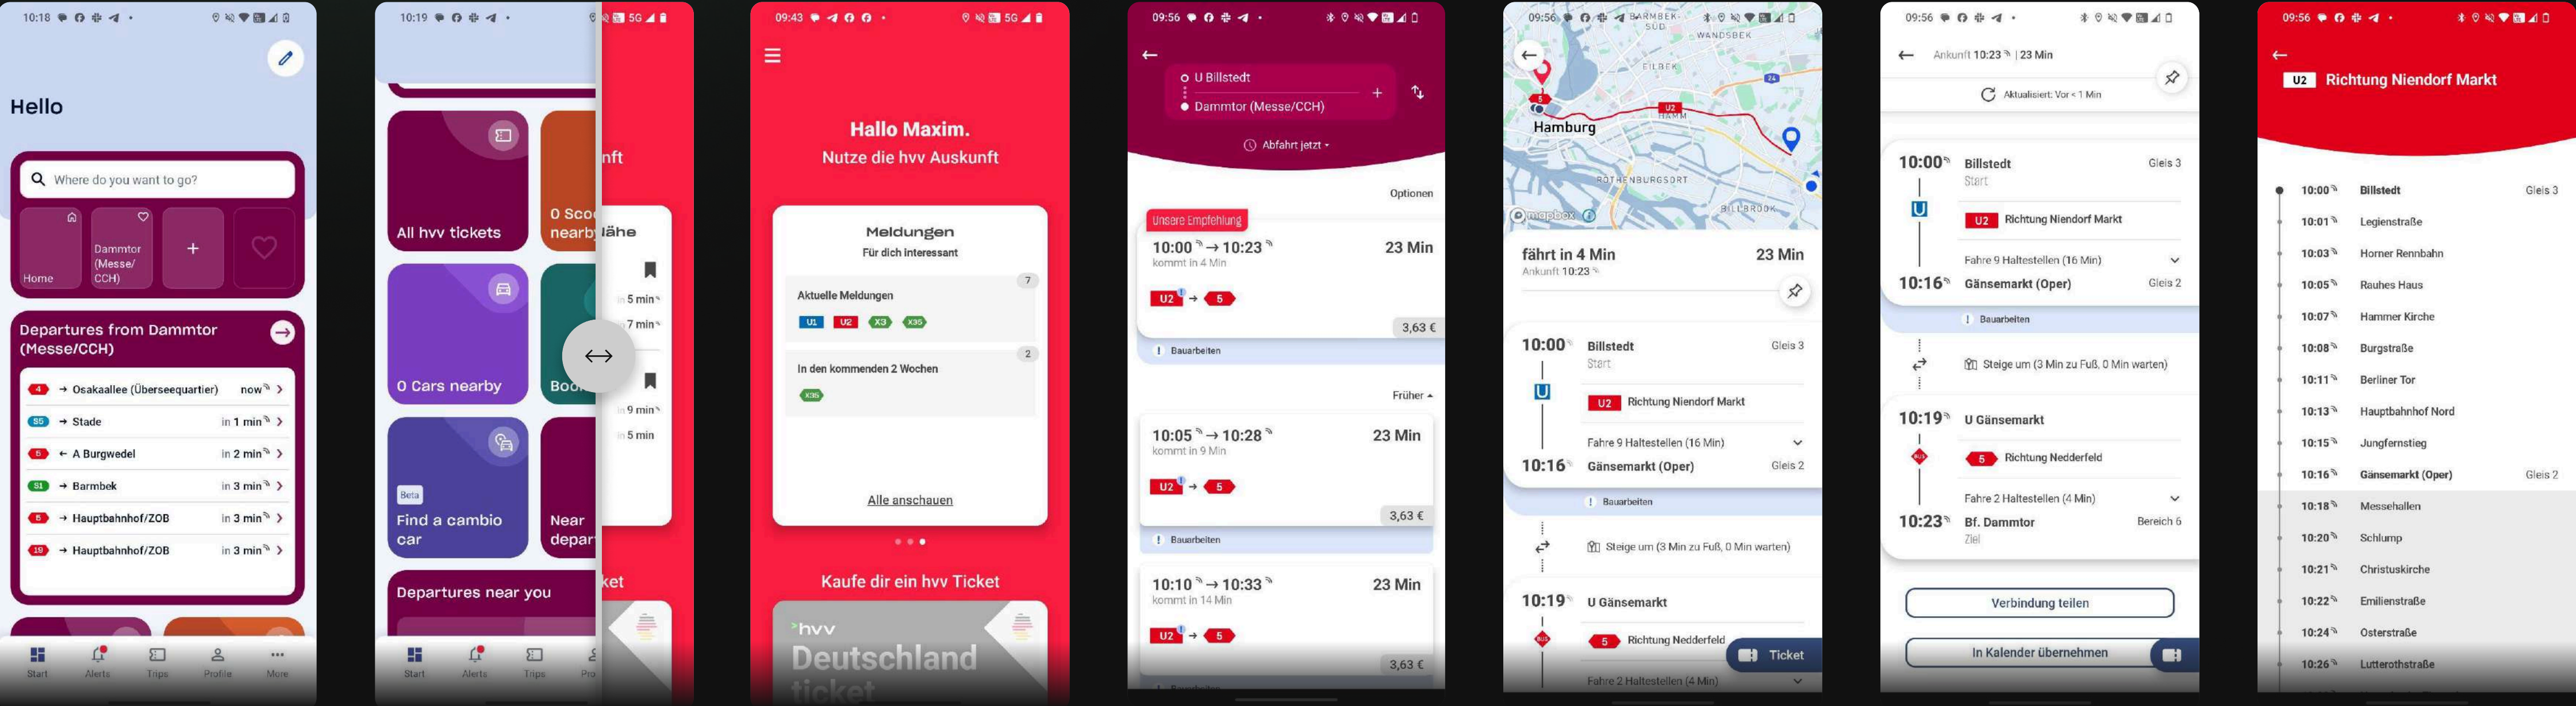

APPROACH

Conducted UX research with 30+ user interviews. Established research cycles tied to the sprint backlog — 100% of epics were user-informed. Tested key flows using Maze. Created a roadmap with milestones and prioritisation.

RESULTS

- Reduced **scheduling time by 40%** by redesigning the fragmented workflow
- Improved **SUS from 54 to 76** through monthly research-test-refine cycles
- Cut **approval rounds from 4 to 2** by front-loading research and low-fi validation
- Reduced **design inconsistencies by 40%** by rebuilding the shared design system
- Initiated a project to integrate **ML-based planning support**

HVV SWITCH. CONTEXT

Task: Redesign of Hamburg's multimodal mobility app (ÖPNV part)

Team	• Product Owner • Scrum Master • 2 Designers • 6 Developers & 3 QAs	Project stack	• Native app guidelines • WCAG 2.1 AA • Multi-layer design system • ZeroHeight	Stakeholders	• Top Management (HOCHBAHN AG) • HVV marketing department • Marketing Agency • Accessibility agency
-------------	---	----------------------	--	---------------------	---

* Co-led design with another product designer, owning public transport flows and their integration into the multimodal experience.

HVV SWITCH. CHALLENGES

- Public-sector environment with political and institutional dependencies
- Large, active user base (100k+) with highly diverse needs
- Maintaining consistency across 3 different CIs and multiple teams

The collage features several news snippets and app store cards. News articles include: 'hvv switch-App wird ausgebaut' from Zughalt.de; 'Neuer Look, neuer Name: Verschwinden jetzt die beliebten HVV-Apps? (M+)' from MOPO; 'Verkehr: Nutzer sollen Nahverkehrsapp Max selbst gestalten können' from DIE ZEIT; 'HVV: Diese App wird zum „Herzstück der Mobilität“ in Hamburg' from Hamburger Abendblatt; 'New Max transport app to be launched in second half of 2026' from Berlin.de; and 'HVV stellt am Donnerstag die App "Any" ein' from Radio Hamburg. App store cards include: 'hvv switch: Tickets & Sharing' (4+ rating, 4.3 stars, 27,832 reviews); 'hvv - ÖPNV Tickets & Fahrinfo' (4.2 stars, 49,900 reviews, 1M+ downloads); 'hvv - Hamburg Bus & Bahn' (4+ rating, 4.4 stars, 4,506 reviews); and 'hvv switch: ÖPNV & Sharing' (4.2 stars, 6,048 reviews, 1M+ downloads).

HVV SWITCH FOR HOCHBAHN AG

APPROACH

Established a structured design flow. Ran multiple user tests and beta tests. Built team processes including weekly design reviews and structured onboarding. Maximised client involvement throughout.

RESULTS

- Grew **MAU by 18%** in 6 months by reducing friction in commute flows
- Reached **34% feature adoption** within 30 days by surfacing features contextually
- Achieved **87% task completion** on ticket purchase by simplifying step structures
- Cut **design-related dev tickets by 60%** with a pre-sprint review process
- Designed, tested and launched **6 new key features**

THE COMMON THREAD

Each project started in uncertainty. I didn't enter as an expert — I entered as a learner obsessed with mastering the unknown and designing the best possible solution.

My superpowers are curiosity and collaboration. I stay close to developers and users, building bridges between order and creativity, innovation and usability, product and people.

THANK YOU!
